

Abstract

Agrochemical compositions including compounds of the general formula (I), as defined herein, such as, N-(1-deoxy glucityl)N-(2 hydroxy dodecyl)-N-methyl amine, can function as emulsifiers, dispersants or, and particularly, as adjuvants. The agrochemical can be a plant growth regulators, herbicides, and/or pesticides, for example insecticides, fungicides, acaricides, nematocides, miticides, rodenticides, bactericides, molluscicides and/or a bird repellent. Particularly useful formulations include water soluble herbicide(s), particularly such as Glyphosate, Sulfosate, Glufosinate and Paraquat.
